

Target FED Exercise Functional Specification

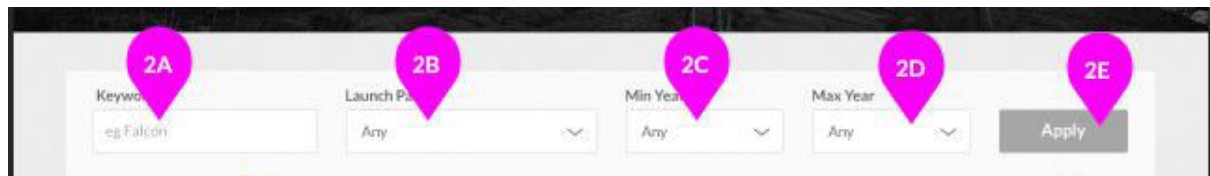

1 Header

1A

On Click, the page should scroll the header up just out of view.

2 Filters

2A

Entering a value will filter results where it's value matches either flight numbers, any word in rocket name or any word in payload id. If no value is entered, this should match all launches.

Place holder text is "eg Falcon".

2B

Launch pad select box, values are populated by launch pad data and should display the "launch pad's full name". Additionally, there should be an "Any" option which is selected by default.

Selecting an item will filter results to only missions launched from the selected launch pad. Selecting "Any" should match all launches.

2C

Min year select box, values are populated by all available years in launch data. Additionally, there should be an “Any” option which is selected by default.

Selecting a year should filter results to those launched on or after the year selected.

Selecting “Any” should match all launches.

2D

Max year select box, values are populated by all available years in launch data. Additionally, there should be an “Any” option which is selected by default.

Selecting a year should filter results to those launched on or before the year selected.

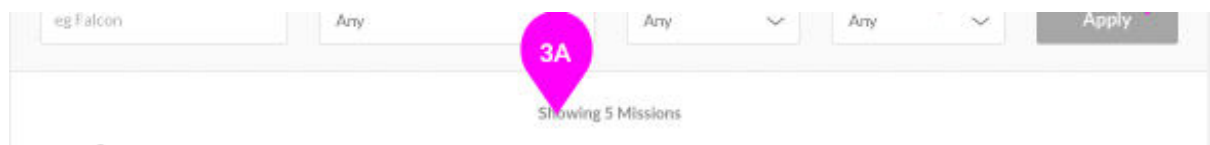

Selecting “Any” should match all launches.

2E

Apply button should apply all the filters from 2A, 2B, 2C & 2D to launch data and display matching results.

If an invalid year range has been selected, an alert should be presented to the user.

3 Results Header

3A

Should display how many results are showing as “Showing [N] Missions”.

4 Mission List Item

4A

If available, the “mission patch” image should be displayed.

4B

The title should display as “[ROCKET NAME] - [PAYLOAD ID]”

If the mission is deemed unsuccessful by either a “failed launch” or a “failed landing”, the red text “Failed Mission” should be appended to the title.

4C

Subtitle should display as “Launched on [DATE] at [TIME] from [LAUNCH PAD FULL NAME]”

4D

All button links should open in a new tab.

If link available, the “Reddit Campaign” button should display and link to the campaign site

If link available, the “Reddit Launch” button should display and link to the launch site

4E

Displays the launch “flight number”.

5 Footer

5A

Clicking this link should scroll the browser back to the top of the results.
